ACC Physio Enquiry Seminar,

To Whom it may Concern:-

Our son suffered a serious head injury in a motor vehicle accident 20 years ago, leaving him severely brain damaged.

Through the years we have worked very hard to get his mobility together - plus all the other numerous injuries to his body.

Our son has needed ongoing therapy treatment with a physiotherapist for ~~most~~²⁰ of these years, and at

times we have found delays in the A.C.C. systems to get this treatment. We have had to call meetings with our Case Manager, I...N & Physiotherapist to prove that he needed this weekly input.

Our son has made tremendous steps with the help of a physiotherapist but just very frustrating at times when there would be weeks of delay waiting for A.C.C. to approve ongoing sessions.

I have with-held his name at this stage as I would like it to be confidential

Yours faithfully
(Mrs) R. Hester.

The Birchcroft Gardens.
